PROFESSIONAL SUMMARY

Java Full Stack Developer skilled in **Spring Boot, JPA/Hibernate, PostgreSQL, MySQL**, and **RESTful API** design following **MVC** and **Microservices** architecture. Built **CafeDesk** handling **500+ concurrent orders** with **JWT-based RBAC** and a normalised 6-table schema. Developed a **Doctor-Patient Appointment System** with 3 user roles and conflict-free scheduling. Trained at **QSpiders** in full-stack Java development (**Spring Boot + React.js**). Immediate joiner — open to **Java Backend** and **Full-Stack Developer** roles across India and remote.

TECHNICAL SKILLS

Languages	: Java , C++
Backend	: Spring Boot, REST API, JPA, Hibernate, JDBC, Servlets & JSP, Microservices
Frontend	: React.js, HTML5, CSS3, JavaScript
Databases	: PostgreSQL, MySQL, Schema Design, Query Optimisation
Tools / DevOps	: Git, GitHub, Maven, Docker, Postman
Architecture	: MVC, Client-Server, Microservices, RESTful Design
CS Concepts	: Data Structures & Algorithms, OOP, DBMS, Operating Systems
Testing	: Selenium Automation (Basics), API Testing with Postman

PROFESSIONAL EXPERIENCE

QSpiders, Deccan, Pune, Full Stack Developer Trainee

Feb 2026 – Present

- Designed, developed, and deployed **2+ Java-based full-stack applications** integrating Spring Boot REST APIs with React.js, owning the complete SDLC from requirements gathering and schema design through testing and deployment.
- Wrote clean, maintainable Java code following **OOP principles** and **MVC best practices**; collaborated with cross-functional peers to define technical specifications and implement solutions using Git branching workflows and Maven build pipelines.
- Contributed to technical documentation including **API specifications** and design schemas; actively staying up-to-date with emerging Java frameworks and industry trends.

Triplets Service Pvt. Ltd., Sangli, Backend Developer Intern

Jul 2023 – Aug 2023

- Designed, developed, tested, and deployed **8+ production-grade RESTful APIs** using Spring Boot, JPA & Hibernate, following clean code standards and **boosting system throughput by 35%** under concurrent load.
- Debugged and resolved critical database inefficiencies by re-engineering schema to **3NF normalisation**, performing code-level analysis to identify improvement areas and **reducing redundant data reads by 40%** while improving query efficiency by 30%.

PROJECTS

CafeDesk — Cafe Management System | Java, Spring Boot, PostgreSQL, Hibernate/JPA, JWT | [Click To See](#)

Jan 2026 – Present

- Designed, developed, tested, and deployed a scalable **Java-based multi-role backend** processing **500+ concurrent orders** with real-time billing, inventory and user management; implemented **Spring Security-aligned JWT-based RBAC** (Admin / Employee / Customer).
- Wrote clean, efficient code exposing **15+ RESTful endpoints** following microservices-ready architecture; designed a **normalised 6-table PostgreSQL schema** and applied JPA optimistic locking to ensure full data consistency.

Doctor-Patient Appointment System | Java, Servlets, JSP, JDBC, MySQL | [Click To See](#)

Aug 2025 – Dec 2025

- Participated in all SDLC phases — requirements, design, development, testing, and deployment — to build a full-stack Java application with **3 user roles** (Admin, Doctor, Patient) and **conflict-free double-booking-proof scheduling** enforced via JDBC transactions.
- Wrote clean, secure Java code with prepared statements eliminating **SQL injection vulnerabilities**; designed a **5-table MySQL schema** with referential integrity and implemented session-based authentication.

EDUCATION

B.Tech in Computer Science & Engineering, Nanasaheb Mahadik College of Engineering, Peth, Sangli

2021 – 2025

HSC (Class XII), Sadguru Junior College of Arts & Science, Islampur, Sangli

2020 – 2021

SSC (Class X), Mohanrao Patangrao Patil High School, Borgaon, Sangli

2018 – 2019

CERTIFICATIONS

- Full Stack Development Certification** — QSpiders
- Programming in Java Certification** — Coding Seekho

ACHIEVEMENTS

- Designed, developed, and deployed backend system sustaining **500+ concurrent cafe orders** with zero data loss under load.
- Debugged and resolved database redundancy; reduced reads by **40%** and improved query efficiency by **30%** during internship.
- Increased REST API system throughput by **35%** through Hibernate query optimisation and endpoint redesign.
- Designed and implemented conflict-free appointment scheduling enforced at DB transaction level for a healthcare application.
